

Corporate Munim™

THE BUSINESS EXPLORER

*As simple as you need and
as advanced as you can handle*

Success is the result of vision full planning and skillful execution. Any business organization regardless of its size; has to focus on core areas of business like business development, operation management, cost management and above all human management. It is not so easy, especially, when we all are rushing in the race of being market leaders in this cutting edge of competition. To make it happen, what we need is: Correct People and Correct Tools.

When it comes to correct tools, **Nutec Infotech Pvt. Ltd** offers you **Corporate Munim the complete ERP solution**. Corporate Munim is developed after in depth research of each business requirement. In olden days, 'Munimji' used to be only one and reliable point of information and communication to his 'Shethji'. We aim our ERP Solution to work like a loyal 'Munimji' for today's corporate business people like you.

Corporate Munim makes your business processes smooth and streamlined, as a result you and your top management can utilize your power and energy for business enhancement rather than using them in sorting out the communications and reports.

Why do you need ERP solution when you can manage with tools like excel or google docs or so on? Let's think over it.

What are the general challenges of any business process ?

- ▶ Effective use of business intelligence
- ▶ Tracking each stage of planning and execution
- ▶ Maximum utilization of each resource and asset
- ▶ Coordination and communication between various departments
- ▶ Delays in decision making process due to:
 - ▷ Lake of coordination
 - ▷ Lake of proper data analysis at required time and place
 - ▷ Lake of down streamed activities
- ▶ Missing the flow of work
- ▶ Wastage of time in streamlining small activities
- ▶ Tracking visible and non-visible performance of each individual and department
- ▶ Healthy working environment
- ▶ Customer or client satisfaction

As per the nature of business, some companies can have even more complex challenges

And their results are:

- ▶ Performance not meeting the expectations
- ▶ Speed down the growth
- ▶ Frustrations among management and staff
- ▶ Aggressive approach of company becomes defensive
- ▶ A company that has potential to be a market leader, may struggle for increased profit just due to lake of proper system

If a complete ERP solution can help you in getting over such issues and moving forward to a brighter future then why not to allow ?

What do we mean by A Complete ERP Solution ?

A complete ERP system means an ERP system that creates business automation for your entire company. It covers each part of your business and once you deploy it, you don't need any other tool or solution. It fits with the way you do business; your budget and time; level of your staff IT expertise and your working systems. Even it copes with your changing needs and provides you the high degree of flexibility.

In this context, Corporate Minum is really a complete ERP solution which is not limited to any particular area or section of business. Regardless of size and complexity of your company, Corporate Minum allows you to reap the advantage of agile technology for your business growth.

Again, why Corporate Munim only?

- ▶ Ability to work like companies performance spectrum
- ▶ Ensures better utilization of each resource and asset
- ▶ Ensures greater transparency and operational control
- ▶ Facilitates collaboration between team members
- ▶ Improved management control and reporting systems
- ▶ Allows you to expand your business horizon from a single location
- ▶ Accelerates and ensures responsiveness to activities that impact your business
- ▶ Enables you to get complete overview of your business from a single screen
- ▶ Acts like a 'Business Intelligence Tool' for business growth analysis
- ▶ Improved Customer experience
- ▶ Improved Operations
- ▶ Improved team work possibilities
- ▶ As a result: Improved Business
- ▶ Cost effective still the best and user friendly ERP solution
- ▶ Scalable solution at your place where there is no dependency on solution provider
