Mr. K.P. Sompura, G.M Finance,
Lincoln Pharmaceuticals Ltd.

Zero Vendor Dependency – The broader context of freedom and security

Zero Vendor Dependency gets defined at its best when your in house IT team is empowered to configure the desired features and functionalities using simple queries or just through several clicks, and you make maximum business benefits out of that empowerment. Zero Vendor Dependency proffers:

- Self-administered workflow configuration and management at granular level without any vendor intervention
- Full freedom to experiment Protocol Vs. Controls practices to leverage automated technology advantages
- Zero possibility of strategy leakage or policy leakage
- Protection from the hidden questionable impacts of policy configuration
- Massive cost advantage
